

Announcement

June 3, 2008

With thanks to the generous support from the Indusa Global Corporation, we are pleased to announce the initiation of the ***Indusa Global Laboratory for Security Studies*** at the Florida Institute of Technology (Florida Tech) – a leading *research one* distinguished institute located in Melbourne Florida. Florida Tech’s engineering management program has been ranked 11th in the nation according to the American Society of Engineering Education, ahead of MIT and Dartmouth respectively, and is a leading R&D institute in the field of security and preparedness.

The Indusa Global Laboratory for Security Studies, with its state-of-the-art computers and software, will be used by students and research faculty to investigate ways to better defend against security threats and to facilitate governments and practitioners in building a secure future in a global society. The “lab” will initially be housed in the Link Building at Florida Tech, and will relocate to the new Harris Center for Security Assurance upon its completion in 2009.

Link Building

Harris Security Assurance Center
(January 2009)

This has been made possible by the generous sponsorship of our corporate partners for helping to secure people and organizations in a global society for the common good.

Sincerely,

Michael

Michael Workman, Ph.D.
